PSA Diesel Particulate Filter Tool

- Regenerates Diesel Particulate Filters
- Resets ELOYS Additive Lights
- Filter Replacement Function
- Numerous Systems Covered
- Supports Vehicles from 2000 on
- Handheld, user friendly, simple and easy to use
- Compatible with latest CAN vehicles

Overview

Modern diesel vehicles in the Peugeot / Citroën range are fitted with complex anti-pollution systems, these systems require servicing and resetting which can only be completed via diagnostics. The PSA FAP tool allows you to service Diesel Particulate Filter systems without sending the car to a main dealer.

The tool will reset the DPF Light after the filter has been replaced, reset the additive level after it has been topped up, and burn any particles that have clogged the filters (regeneration).

Functions

- Replace Filter
- Additive Reset
- Regenerate

Applications

Please see the latest instruction manual on spsupport.com for full application information.

System

CITROEN

C4	DCM 3.4 FAP
