### VAG Service Light Reset & EPB (Electronic Park Brake) Tool

- Handheld, user friendly, simple and easy to use
- Rubber Over-Boot Protection Moulding
- Compatible with latest CAN vehicles
- Resets Service Lights & Intervals - Fixed, Long-Life & Time & Distance
- Resets brake pad wear indicator where applicable
- Tests EPB caliper functionality
- Allows retraction of caliper for safe pad and disc replacement
- Tilt angle calibration for "Auto Hold" systems
- Updateable (return back to SP Diagnostics)

This latest version now offers; service light reset, schedule reset, including 'Time & Distance' on UDS14229 CAN protocol models, along with Electronic Parking Brake functions for all models up to 2015. Additions to this coverage include Golf MK7, Octavia 3 , Superb B8 , Alhambra 7N and Leon 5F platforms, as well as 2015 model year extension to existing coverage.

### **New VAG Service Light Reset Tool and EPB Tool combined - DESIGNED, MANUFACTURED & SUPPORTED IN GREAT BRITAIN.**

This new combined tool offers Service Light Reset (SLR) on Audi, Volkswagen, Seat & Skoda models with Fixed, Long-Life and Variable intervals, including 'Time & Distance' as fitted on most models from 2008> . As well as SLR capability, this cost effective tool also offers Electronic Parking Brake (EPB) coverage and functionality on VAG models fitted with EPB.

### **Overview**

This service reset tool has been designed to allow a safe environment to service braking systems on the newer vehicles in the VAG range. From simple caliper retraction on Passat to the more involved pad calibration required on the newer A8, the SP Diagnostics SLR/ EPB reset tool will do the job. Tilt Angle calibration is required for vehicles with the Auto Hold parking brake control, this could be after crash damage or sensor replacement, calibration is required for the correct operation of this system.

### **Functions**

*Open Calipers* - Retracts calipers to allow access to the pads and disks safely, also required when fitting a new caliper, park brake motor, wheel hub etc.

*Close Calipers* - After servicing the caliper can be returned to the correct position.

*Basic Setting* - Cycles the braking system 3 times to allow correct movement and function to be checked.

*Open Caliper With Pad Change* - For the A8 the wear indicator is also reset by entering the pad thickness either after new or cleaned pads have been fitted to the vehicle.

*Close Caliper With Pad Change* - For the A8 the wear indicator reset is confirmed using this process.

*Tilt Angle Calibration* - For vehicles fitted with "Auto Hold" systems this sensor can be re-calibrated after removal or replacement.

### **Coverage - Service Light Reset Audi**
